Services

DISCLAIMER:

Please Note: The Sustainability Report created by the Diversion Metrics application (owned by Dumpster Connect, LLC dba USA Environmental Services) is generated through estimates and approximate that combine service levels, volume, material type and greenhouse gas equivalency figures throughout a period of time (i.e. 12 months). The United States Environmental Protection Agency offers a greenhouse gases equivalencies calculator to the public. Some of the equivalencies used in the calculator are reported as CO2 equivalents (CO2E). These are calculated using GWPs from the Intergovernmental Panel on Climate Change's Fourth Assessment Report. The calculation for Recycling Impact & Carbon Dioxide Equivalent helps you translate abstract measurements (i.e. emission reduction from tons recycled) into concrete terms you can understand, such as the annual emissions from cars, households, or power plants. **This calculation may be useful in communicating your company greenhouse gas reduction strategy, reduction targets, or other initiatives aimed at reducing greenhouse gas emissions.** These estimates are approximate and should **not** be used for emission inventories or formal carbon emissions analysis or examination.

For more information on the calculations and references for equations and sources used by the EPA, visit www.usaenv.com/diversion-metrics-disclaimer
